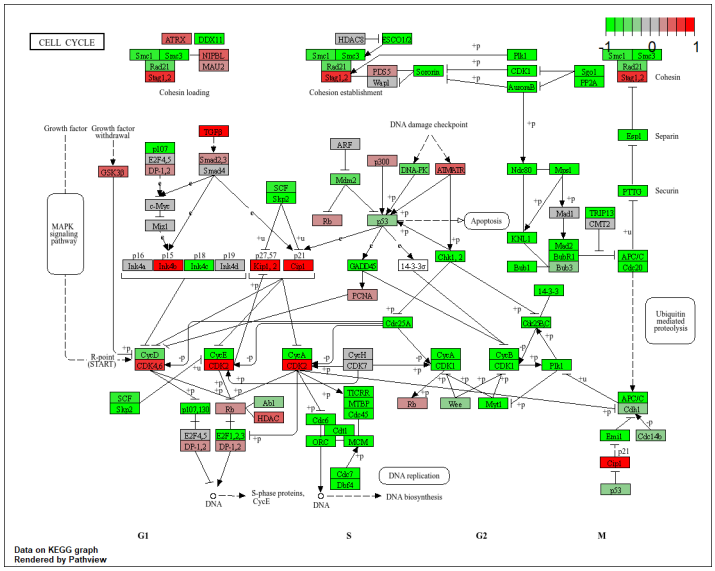

Figure 1: pathwayfigure

Reactome

we can use reactome as an R package or we can use the online versionwhich has some new interactvie visualization features. lets try the web version

it wants us to upload a file with genes of interest (ie. thise with significant difference for our experiment)

```
sig_genes <- res[res$padj <= 0.05 & !is.na(res$padj), "symbol"]
print(paste("Total number of significant genes:", length(sig_genes)))
```

```
[1] "Total number of significant genes: 8147"
```

```
write.table(sig_genes, file="significant_genes.txt", row.names=FALSE,
col.names = FALSE, quote=FALSE)
```
